DISSERTATION

Title: Human Dignity and the Law in post-War Europe

Abstract: *The research offers a critical analysis of the legal norm of human dignity as codified in the Charter of Fundamental Rights of the European Union and shows the need for a principled understanding of the notion of human dignity. Through assessing both the philosophical and historical roots of the legal concept of human dignity, as well as the current application thereof by the courts, the work aims to contribute to a better understanding of this much used but little understood philosophical and legal principle.*
